

Risk Assessment and Risk Management Record

Establishment: The Hardelot Centre, Hardelot, France

Location / purpose: Residential visit – School group

Identifying the hazards – assessing the risk	Risk rating	Control Measures – reducing the risk	Outcome
<p>Fire</p> <p>Open fire: Physical, chemical, biological hazards for group Personal safety Environment-al impact</p>	High	<p>All visitors thoroughly briefed with regards to Fire Safety: Fire safety briefing includes whole site no smoking, reference to escape routes (notices in all public rooms and bedrooms) alarm sounding and fire drill (recorded in fire safety log) and location of muster point. Leader briefing and welcome pack include how to summon emergency services, location and operation of the alarm system control panel. Open fires outdoors can only be lit in the designated area. They must be managed at all times by visiting staff and are under the direct supervision of the group leader. If an open fire is to be lit in the designated area, water supplies and first aid must be in place before fire is lit. Any fire must be kept small and easily manageable at all times and extinguished before leaving the area. Only adults will fuel/stoke the fire if needed and young people will not be permitted to throw objects on to the fire. Only timber will be used (no plastics etc) Young people will be kept at a safe distance from the fire at all times. The assistance and/or presence of Centre staff can be provided.</p>	Low
<p>Injury on site</p>	Med	<p>All visitors briefed with regard to size and nature of the site. All visitors briefed at welcome talk to ensure they do not roam unaccompanied or without letting their group leader know their whereabouts.
